EDUCATION

Indian Institute of Information Technology and Management, Gwalior Nov 2022 – May 2027
Integrated BTech (Information Technology) & MBA CGPA: 8.08/10

WORK EXPERIENCE

Amazon May 2026 – Jul 2026
Applied Scientist Intern Bengaluru, India

- Implemented a modular **automatic prompt optimization framework** using **Python** and **AWS Bedrock**, supporting **7 algorithms** across **4 Alexa quality and safety tasks**.
- Engineered an automated experimentation and evaluation pipeline for **2,800+ labeled conversations** using held-out testing, task-specific **F1**, and **exact-match metrics**.
- Proposed and implemented enhancements to the optimization workflow, improving held-out **F1 by up to 12%** across diverse NLP tasks.

Neural Network Labs Jan 2025 – Mar 2025
Full Stack Developer Intern Remote

- Engineered **3 web pages** using **Next.js** and **Tailwind CSS**, contributing to a **30% increase** in user engagement measured through A/B testing.
- Integrated backend services with **AI/ML models** to deliver personalized content to **1,000+ users** using **Node.js** and **REST APIs**.
- Reduced system latency by **35%** by designing microservices and optimizing **20+ REST API endpoints** using **Express.js** and **MongoDB**.

PROJECTS

Pictovia | *React, Node.js, Express.js, MongoDB, Stripe, ClipDrop API* Jun 2025 – Present
GitHub Repository

- Built a **MERN-based AI image platform**, integrating the **ClipDrop API** to generate downloadable images from text prompts.
- Developed secure **REST APIs** with input validation, **JWT authentication**, bcrypt hashing, and MongoDB-backed credits.
- Integrated **Stripe Checkout** with verified webhooks and idempotent credit allocation.
- Created a **Canvas-based image editor** with **13 controls** and a persistent image gallery using **localStorage** and **IndexedDB**.

RAG-Based VisionBot with Decentralized Data | *Python, Transformers, FAISS, IPFS, Docker* Mar 2026 – May 2026
GitHub Repository

- Built a multimodal **RAG application** integrating **Llama 2 7B**, **BLIP**, and **CLIP ViT-L/14** for image captioning, semantic retrieval, and visual question answering.
- Designed a retrieval pipeline that indexed **1,000+ multimodal embeddings** using **FAISS** with decentralized data storage through **IPFS**.
- Enabled offline, CPU-compatible inference using **CTransformers** and containerized the application with **Docker** for reproducible deployment.

TECHNICAL SKILLS

Programming: C++, Python, Java, JavaScript, TypeScript
Backend: Node.js, Express.js, REST APIs, Microservices, WebSockets, JWT Authentication
Frontend: React.js, Next.js, Tailwind CSS, Framer Motion
Databases & Storage: MongoDB, PostgreSQL, MySQL, FAISS, IndexedDB
Cloud & Tools: AWS Bedrock, Git, GitHub, Docker, Postman, Firebase, Vercel
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

ACHIEVEMENTS & LEADERSHIP

- Solved **700+ DSA problems** across **LeetCode** and **GeeksforGeeks**.
- AIR 72 – Goldman Sachs India Hackathon 2026**, among **16,000+ participants**.
- Secured **Rank 41** among **87,000+ participants** in the **Amazon ML Challenge 2025**.
- Semi-Finalist, Flipkart GRiD 7.0**, among **160,000+ participants**.
- Selected for **Amazon ML Summer School 2026**.
- Served as **Joint Secretary, SAC Sports (2024–2025)** and Coordinator of the **Inter-IIIT Sports Fest 2025**.
